

Kindergarten Bindfeldweg

Kindergarten extension including a children's restaurant

250 children come to the childcare „elbkinder“ in Hamburg Niendorf on a daily basis to play, sleep and eat.

Making sure everyone is fed is the childcare's restaurant.

Due to the initiative „Krippenausbauprogramm“ there was a need for another crèche room including sanitary facilities. It resulted in a domino effect.

The old corridor had to be demolished and rebuilt and whilst in full service the childcare got a generous children's restaurant adjacent to the onsite kitchen facilities.

From now on the childcare can offer a kids-friendly buffet solution.

The former eating spaces now house the new crèche rooms. In close coordination with the childcare's management Neustadtarchitekten planned the logistic concept of and the realization itself on behalf of lup architekten

In the second step the 100 m long connecting corridor which is also used for playing in between the buildings was demolished and rebuilt including the facades.

All the added parts consists of a timberframe construction clad with cement-Fibre plates in different colours adding joyful highlights to the facade

gross area	400 m²	building cost	1,0 Mio €	KG	300+400
