

## Kindergarten Kirchentwiete

A listed building from the Wilhelminian becomes a lively place for 70 children

Demolition of the former childcare Mottenlos e.V. in Rothesstrasse as well as the need to grow led to the redesign

Spaces of choice became the rooms on the ground floor in Hamburgs famous Elbchaussee

Challenging were the requirements for a flexible layout and still offering noise protection.

Protection against the noise from the highly frequented street and for the appartements above the childcare.

The childcare was equipped with a ventilation system alongside Noise and heat protective windows facing the Elbchaussee.

Large areas of the ceiling were upgraded to meet the noise protection requirements

Group rooms and functional areas were arranged with noise levels in mind - the kitchen, Play- and eating areas are situated alongside the street - the nursery is facing the quiet Kirchentwiete.

A bright corridor invites for playing and connects the different areas allowing good orientation
