

Meisterweg 104, Lüneburg

co-building group

Co-building project in Lüneburg

A new co-building group will be situated close to the historic center of Lüneburg

Right next to the other co-building project we designed eight appartements will take shape.

The cubic building sets back to follow the curved outline of the plot.

The appartements group around one central staircase.

Each of them having either a terrace, loggia oder roof terrace.

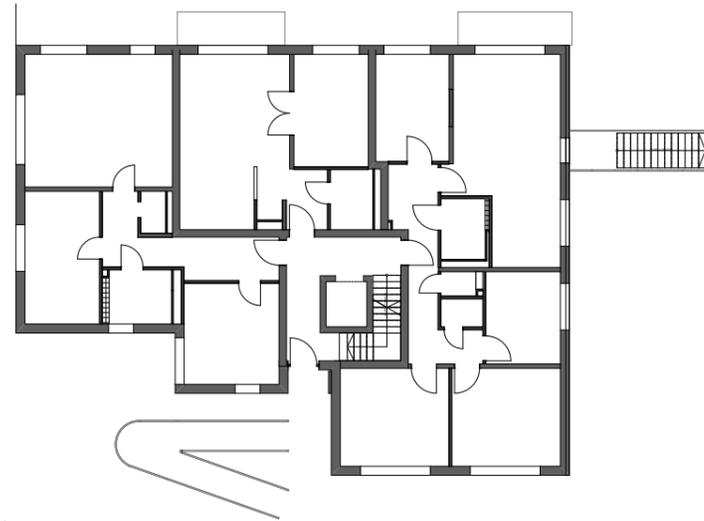

West facing the future owners will have an astonishing view due to the buildings position right at a slope's edge

The building will be constructed of highly insulated bricks.

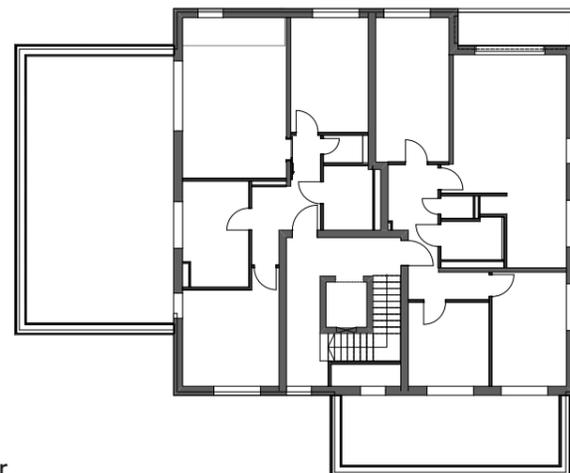

Therefore we achieve the desired energy standard without using a mantled insulation construction.

gross area	740 m ²	building cost	1,65Mio € KG 300+400
year	2018	size	8 appartements
